Settings & trust boundaries
Illustrative policy defaults: institution response 10 days; verification 15 days; verification ageing SLA 15 days; example minimum deposit ₹10,00,000; example required tenure 365 days. These are not AICTE policy thresholds.
Separate checks: anomaly detection examines internal record logic; document reconciliation compares a record with simulated extracted values; bank confirmation is a SIMULATED RESPONSE, not proof that a deposit is genuine.
Missing external records and timeouts are unresolved evidence, never automatic proof of fraud. No real OCR, bank integration, SSO, email, SMS or durable storage is connected.
